## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to an article which may be selectively secured to a mounting substrate, classified in class 428, subclass various.
- II. Claims 7-20, drawn to an index card assembly, classified in class 40, subclass various.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. In this case, the Group I, claims 1-6 are drawn to an article, which can be secured to a mounting substrate. The article comprises a first substrate having a writeable surface on one side thereof and mounting surface on a second opposite side thereof; and a pressure sensitive adhesive on the second side of the first substrate. The article is secured to the mounting substrate. The Group II, claims 7-20 are drawn to an index card assembly.
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. Yen Tong Florczak on 10/08/05 to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
